	LIST OF TABLES	X
	LIST OF FIGURES	
XIII		
1	PROJECT OVERVIEW	1
1.1	Introduction	1
1.2	Problem Background	2
1.3	Problem statement	4
1.4	Objectives of the project	5
1.5	Scope of project	5
1.6	Significance of project	5
1.7	Conclusion	6
2	LITERETURE REVIEW	7
2.1	Introduction	7
2.2	The effect of inclement weather	8

2.2.1	Hot and Dry conditions	9
2.2.2	Cold weather	11
2.3	Decision support system models	11
2.3.1	Decision support system in construction industry	13
2.3.2	Decision making	15
2.3.3	Analytic hierarchy processes	16
2.3.4	Analytic Network Process	17
2.4	Statistics	18
2.4.1	Regression analysis	19
2.4.2	Liner regression analysis	19
2.4.3	Non Liner regression analysis	20
2.4.4	Curve fitting	23
2.4.5	Time series analysis	24
2.4.6	Two general aspect of time series patterns	25
2.5	Statistical decision theory	28
2.6	Principal Component Analysis	28
2.7	Bayesian Probability	31
3	RESEARCH METHODOLOGY	33
3.1	Introduction	33
3.2	Research procedures	34
3.2.1	Background study	34
3.2.2	Methodology	35
3.2.3	Case study	35
3.2.4	Data Analysis	36
3.2.5	Conclusion and future studies	36
3.3	Proposed model	37
3.4	Identify the variables that affect the building construction	38
3.5	Identify Weight of weather factors	39
3.5.1	Model construction and problem structuring	39
3.5.2	Calculate the priorities and pair wise comparison matrices	40
3.5.3	Selecting the best alternative	42
3.6	Identify the trend of most important weather factor	43
3.6.1	Step1 Recognition of model	43
3.6.2	Step3 recognition of model correction	45

3.7	Non linear regression model	45
3.7.1	Step1: Choose a model	46
3.7.2	Step2: Choose initial values	47
3.7.3	Step3: Transform non linear regression to linear regression	47
3.8	Conclusions	48
4	DATA ANALYSIS	49
4.1	Introduction	49
4.2	Identify the variables	50
4.2.1	Identify weather variables which affect duration	52
4.2.2	Identify the activities which are affected	57
4.2.3	Identify the resource and factors	63
4.3	Analytical network Structure	67
4.3.1	Framework for Analytical network process	68
4.4	Identify the pattern of weather factors	74
4.4.1	Identify Temperature trend and pattern	75
4.4.2	Identify Humidity trend and pattern	82
4.4.3	Identify Wind trend and pattern	87
4.5	Identify resource pattern and make a non liner model	92
4.6	Test the model with actual Duration	136
4.7	Decision making model	138
4.7.1	Assistant	138
4.7.2	Predictor	138
4.8	Implementation	139
4.9	Conclusion	140
5	DISCUSSION AND CONCLUSION	141
5.1	Achievement	141
5.2	Obstacle and challenge	142
5.3	Hopes and expectations	143
6	REFERENCE A-B	145-155

LIST OF TABLES

TABLE NO.	TITLE	PAGE
Table 4.1	Activity list	50
Table 4.2	Weather factors	52
Table 4.3	Correlation Matrix of effect of weather factors on activities	52
Table 4.4	Extract weather factors	53
Table 4.5	Eigenvalues of weather components	54
Table 4.6	Component Matrix of weather factors	56
Table 4.7	Correlation matrix of activities	58
Table 4.8	Extraction Method for activities duration	59
Table 4.9	Extraction method of principal component analysis	60
Table 4.10	Component Matrix for activities	61
Table 4.11	Correlation Matrix of effect of weather factors on activities	63
Table 4.12	Eigenvalues for resources factors	64
Table 4.13	Component Matrix for resources factors	66
Table 4.14	Weather components priority with respect to Human resource	68
Table 4.15	Weather components priority with respect to Material	69
Table 4.16	Weather components priority with respect to Supplier	69
Table 4.17	Activity components priority with respect to Human resource	70
Table 4.18	Activity components priority with respect to Material	70
Table 4.19	Activity components priority with respect to Material	71
Table 4.20	Resource components priority	72
Table 4.21	Resource components priority with respect to Run ceiling	73
Table 4.22	Final Super Matrix for all factors	73
Table 4.23	R square of Linear model	93

Table 4.24	25 R square of quadratic model for human resource	93
Table 4.25	R square of Logarithmic model	94
Table 4.26	degree of the temperature vs. human resource productivity	95
Table 4.27	R square of Linear model for Human resource productivity	96
Table 4.28	R square of Quadratic model for Human resource	96
Table 4.29	degree of the Humidity vs. human resource productivity	97
Table 4.30	R square of Linear model for Human resource productivity	98
Table 4.31	R square of Quadratic model for Human resource	99
Table 4.32	degree of the Wind vs. human resource productivity	100
Table 4.33	R square of linear model for material norm	101
Table 4.34	R square of Quadratic model for Material norm	102
Table 4.35	degree of the Wind vs. human resource productivity	103
Table 4.36	R square of linear model for material norm	104
Table 4.37	square of Logarithmic model for material norm	104
Table 4.38	square of Quadratic model for Material norm	105
Table 4.39	degree of the Humidity vs. human resource productivity	106
Table 4.40	R square of linear model for Supplier effectiveness	107
Table 4.41	R square of Logarithmic model Supplier effectiveness	108
Table 4.42	R square of Quadratic model for Supplier effectiveness	108
Table 4.43	degree of the Humidity vs. human resource productivity	109
Table 4.44	R square of linear model for Supplier effectiveness	110
Table 4.45	R square of Logarithmic model Supplier effectiveness	110
Table 4.46	R square of Quadratic model for Supplier effectiveness	111
Table 4.47	degree of the Temperature vs. Supplier efficiency model	112
Table 4.48	R square of multiple model	113
Table 4.49	Analysis of variance of the model human resource	114
Table 4.50	Coefficients of variables in the human resource	115
Table 4.51	The excluded variable details of human resource	115
Table 4.52	R square of multiple model for material norm estimation	117
Table 4.53	Analysis of variance of the Material norm model	117
Table 4.54	Coefficients of variables in the material norm model	118
Table 4.55	R square of multiple model	119
Table 4.56	Analysis of variance of the Supplier efficiency model	120
Table 4.57	Coefficients of variables in the supplier efficiency model	121

Table 4.58	R square of Linear model for	122
Table 4.59	R square of Logarithmic model for Construction	123

Table 4 74	Sign test for Actual data and estimated	137
Table4 75	p value of sign test	137

LIST OF FIGURES

FIGURE NO.	TITLE	PAGE
2.1	Productivity trends[2]	14
2.2	Site data[2]	14
2.3	Forecasting and managerial decision making[17]	16
2.4	Linear regression model diagram [26]	20
2.5	Nonlinear regression model diagram[29]	22
2.6	Algorithm of linear regression model[30]	23
2.7	Time series diagram [33]	25
2.8	time series analysis[37]	26
2.9	principal components Analysis	30
3.1	Methodology Diagram	37
3.2	Network structure	40
3.3	Pairwise comparison of Scale for ANP	41
3.4	Super Matrix	42
4.1	Scree plot weather factors	55
4.2	Component plot of weather factors	57
4.3	Scree plot of activity factors	62
4.4	Scree plot of resources	65
4.5	Analytical Network process Structure	67
4.6	Trend of Temperature over time	75
4.7	Trend analysis of temperature	76
4.8	Auto correlation function for temperature	77
4.9	ACF OF temperature after difference method	77
4.10	Partial auto correlation function for difference 1	78

4.11	run test for normality of residual	79
4.12	Parameter estimation	80
4.13	Value of forecast in next 10 periods	81
4.14	Trend of Humidity over time	82
4.15	ACF of Humidity over time	83
4.16	PACF OF Humidity	83
4.17	Residual analysis of humidity factor	84
4.18	Run Test for residual	85
4.19	model of AR (1)	86
4.20	ACF of WIND force for first difference method	87
4.21	ACF OF Wind force after second differences	88
4.22	PACF OF Wind force after second differences	89
4.23	Residual plots of Wind after second difference method	90
4.24	Run test for normality	90
4.25	Forecast value of wind for 9 next month	91
4.26	Curve fitting for Temperature VS Human resource Productivity	94
4.27	Curve fitting for Humidity VS Human resource Productivity	97
4.28	Curve fitting for Humidity VS Human resource Productivity	99
4.29	Curve fitting for Wind VS Material norm	102
4.30	Curve fitting for Humidity VS Material norm	106
4.31	Curve fitting for Humidity vs Supplier efficiency	109
4.32	Curve fitting for Temperature vs Supplier efficiency	111
4.33	Curve fitting for Duration of Construction and installation steel structure activity VS material norm	124
4.34	Curve fitting for Duration of Construction and installation steel structure activity VS supplier efficiency	127
4.35	Curve fitting for Duration of Construction and installation steel structure activity VS supplier efficiency	130
4.36	the procedure of computing duration of the activity on conditioned with resources and weather factors	135
4.37	Demos of DSS for Construction company in KISH	139
